Update about Fine Line Stencil Screen Making in Printed Electronics

Andreas Künkele & Simon Wagner

Andreas Künkele is currently Head of the Applications Laboratory Screen and Textile Printing for the company Kissel + Wolf GmbH in Germany. He has the duties of Screen-Printing Technician and Field Service and Technical Sales in Europe. In 2004, he graduated with a Professional Business Economist Training Certificate at the Karlsruhe Chamber of Trade. In 2003, he was promoted to Team Leader of the Screen-Printing Department Surface Technology, Schroff GmbH (Pentair Group). In 2002, he obtained a Professional Training Certificate as Screen Printing Master from the Chamber of Crafts Rhein Main. In 1992, he began his Technical Training as a Screen Printer at SGE Engelberg.

Abstract:

The presentation will touch the following subjects:

- Update on fine line stencil making for printed electronics – Current status re-garding our Fineline program. Outlook for further developments.
- Most suitable pre-press film for printed electronics –What is the best possible pre-press for the exposure of stencils for printed electronics
- Latest trials regarding the durability of printing stencils treated with release agent - Checking the durability of the treatment with release agent over a high-er print run
- Hint KIWO cooperates with Henkel-Loctite –Thus, the optimal synergy be-tween stencil making and print media for printed electronics
